

JIG SAW BLADES

Cat. Nr.	Dimentions	Type	Package (pcs)
935570170	100 x 75 x 2.5	Wood clean cut	5
935560170	100 x 75 x 4.0	Wood speed cut	5
935580170	85 x 57 x 1.2	Metal	5
935550170	132 x 106 x 2.4/5	Multipurpose	5

JSF100/700E
JSF120/710VE

SPECIAL FEATURES

- Strong and reliable motor designed for long continuous operation at significant loads
- Air ventilated, metal gearbox casing
- Speed regulation of the number of blade strokes for selecting the optimum cutting mode for any specific material
- Four blade pendulum movement amplitude levels
- Dust removal system connection adapter
- Plastic pad on the cast foot ensuring possibility of sawing after finishing without any risk of scratching the machined surface

TECHNICAL DATA		JSF100/700E	JSF120/710VE
Input power	W	705	710
Voltage and current	V	230	230
Frequency	Hz	50-60	50-60
Strokes per minute	min ⁻¹	700-3000	300 - 3000
Cutting capacity:			
- wood	mm	100	120
- light alloy	mm	20	20
- steel	mm	10	10
Weight	kg	3.00	3.20
Item No.		135530370	135530879
Standart equipment		Dust suction adapter, sliding skid, hexagonal key	

RSF120/1010E

Reciprocating saw is a multipurpose tool for sawing almost any type of materials including wood, plastic, metal, foam, aerated concrete, plasterboard and bricks. Almost indispensable tool for carpenters, roofers, finishers, metalworkers, frame structures installers.

SPECIAL FEATURES

- Metal gear box housing for high level of reliability
- Adjustable stop for cutting depth selection
- Speed regulation for efficient operation
- Rubber and plastic cover plates at the body of the tool ensure comfortable use and damage of the gearbox

TECHNICAL DATA		RSF120/1010E
Power consumption	W	1010
Cutting capacity		
- wood	mm	250
- non-alloy steel	mm	120
Stroke rate at no load	min ⁻¹	300-2500
Stroke length	mm	28 mm
Weight	kg	3.80
Item No.		135910170
Standart equipment		Dust suction adapter, sliding skid, hexagonal key
