RF30/430
R400

Professional edging and hinge router is mainly used for recessing door hinges and lock faceplates. The device is provided with plastic guide which allows routing operation avoiding scratches after final finishing of the surface.

SPECIAL FEATURES

- Convenient design allows the tool to be operated with one hand
- Specially designed lift for precise adjustment of the plunge depth to the thickness of the door hinge
- Compact size and small weight
- Adapter for connection of dust removal system which enhances convenience and safety
- Locking of spindle for quick and easy replacement of router bits
