

S254/1800

Easy and simple way to make corner joints trough special bevel gauge. Gauge miter saw FELISATTI simplifies the procedure to a simple operation MEASURE - SET - CUT which reduces error probability to zero. This unique, time saving angle finder system measures wall angles for inside or outside corners and transfers them on the sawing table.

SPECIAL FEATURES

- High precision table with stops and locks
 - Powerful motor that enables easy cuts on the hardest wood
 - High quality blade supplied as a standard equipment
- The design is adapted for both right-hand and left-hand operation

TECHNICAL DATA			S254/1800
Input power	W		1800
No-load speed	min ⁻¹		4800
Sawing blade diameter	mm		254 /30
Angle adjustment range for mitering	°		± 45°
Oblique cutting angle adjustment range	°		0-45°
Weight	kg		14.00
Item No.			135470870
Standart equipment		Saw disk, hex key set, spanner, guide rail; plastic pusher, corner measuring set	

INNOVATIVE ANGLE TRANSFER SYSTEM

SRF305/1800
SRF305/1800E

SPECIAL FEATURES

- Dual bevel function allows user to flip the saw instead the material for increased productivity
 - The model is provided with belt driven motor which is one of the best designs ensuring control and smoothness of stroke
 - Special stop allows making blind cuts for slots with controllable depth
- Adjustable upfront support brackets provide extra support for big workpieces
 - Upfront Bevel Lock system for easy and safe operation
 - Integrated laser for precise sawing
 - Speed preselection (SRF305/1800E)
